ABOUT

Growing up, I had always been fascinated with learning and trying to solve the most challenging puzzles that my mind could handle. After graduating high school, I went on to get a degree in Global Studies & Cultural Geography from university in order to understand the most critical issues impacting the world today. Soon, I discovered that the best way for me to make a difference was the field of technology and software development - not only do I get to learn new things every day, I get to apply my knowledge directly towards solving practical problems.

EDUCATION

Nashville Software School
Full Stack Software Developer

Middle Tennessee State University
B.S. Global Studies & Cultural Geography
Minor in Japanese Language
Linguistics Club Treasurer
