

JANSEN VAN DER SPUY

SOFTWARE DEVELOPER

ABOUT

Growing up, I had always been fascinated with learning and trying to solve challenging problems. After graduating high school, I went on to get a degree in Global Studies & Cultural Geography from university in order to understand the most critical issues impacting the world today. Soon, I discovered that the best way for me to make a difference was the field of technology and software development -- not only do I get to learn new things every day, I get to apply my knowledge directly towards solving practical problems.

Projects

CodeHub [Link](#)

Full CRUD front-end capstone built with React and JSON-Server that allows users to create and share posts about their coding achievements.

- Utilized Cloudinary for image uploads
- Users can view, add, edit, filter, and delete posts and comments
- Planned with Figma, styled with CSS & Material-UI
